## Practice with Scatter Plots

1. A history teacher asked her students how many hours of sleep they had the night before a test. The data below shows the number of hours the student slept and their score on the exam. Plot the data on a scatter plot.

| Hours Slept | 8 | 7 | 7 | 8 | 6 | 5 | 7 | 4 | 9 | 7 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Test Score | 83 | 86 | 74 | 88 | 76 | 63 | 90 | 60 | 89 | 81 |

a. Describe the Correlation.
b. Estimate the value of the correlation coefficient, r. Indicate whether $r$ is closest to $-1,-0.5,0,0.5$ or 1 .
b. Draw the Line of Best Fit.
2. Assume that during a three-hour period spent outside, a person recorded the temperature and their water consumption. The experiment was conducted on 7 randomly selected days during the summer. The data is shown in the table below.

| Day | Temp- <br> erature <br> (F) | Water <br> Consumption <br> (oz) |
| :---: | :---: | :---: |
| 1 | 99 | 48 |
| 2 | 85 | 27 |
| 3 | 97 | 48 |
| 4 | 75 | 16 |
| 5 | 92 | 32 |
| 6 | 85 | 25 |
| 7 | 83 | 20 |

Create a scatter plot with the data. (Hint: Do not use the day on the scatter plot.)
a. Describe the Correlation.
b. Estimate the value of the correlation coefficient, $r$. Indicate whether $r$ is closest to $-1,-0.5,0,0.5$ or 1 .
c. Draw the Line of Best Fit.
