Homework on Velocity

(graphical).

The graph below represents the velocity v, in feet per second, of a particle moving along the x-axis over the time interval from t = 0 to t = 9 seconds.

- 1. At t = 4 seconds, is the particle moving to the right or left? Explain your answer.
- 2. Over what time interval is the particle moving to the left? Explain your answer.
- 3. At t = 4 seconds, is the acceleration of the particle positive or negative? Explain your answer.
- 4. What is the average acceleration of the particle over the interval $2 \le t \le 4$? Show the computations that lead to your answer and indicate units of measure.
- 5. Is there guaranteed to be a time t in the interval $2 \le t \le 4$ such that v'(t) = -3/2 ft/sec²? Justify your answer.
- 6. At what time *t* in the given interval is the particle farthest to the right? Explain your answer.
