## Part A: Addition and Subtraction of Positive and Negative Integers

	<b>Perform</b> the Operation.	<b>Graph</b> the Operation on a Number Line:	<b>Perform</b> the Operation with <i>Decomposition</i> :
1.	3 + 8 =	-2 0 2 4 6 8 10 12 14	
2.	11 – 7 =	-2 0 2 4 6 8 10 12 14	
3.	2 + (-8) =	-2 0 2 4 6 8 10 12 14	
4.	-2 + 8 =	-2 0 2 4 6 8 10 12 14	
5.	5 – (-9) =	-2 0 2 4 6 8 10 12 14	
6.	-5+12=	<del></del>	
7.	6-(-9)=	<del></del>	
8.	-5 + (-5) =	-	
9.	-12-(-6) =		
10.	7-(6) =		

## Part B: Understanding Equivalence

	Transform the expression into an equivalent expression.	Graph both the Operations on the Number Lines:	Explain why the expressions are equivalent.
11.	-6+14=	<del></del>	
		<del></del>
