

Main Ideas/Questions	Notes/Examples
----------------------	----------------

Vertical and Horizontal lines

Vertical Lines

A **vertical line** is written in the form $x = a$, where a represents the line's x-intercept.

The equation of the **vertical** line graphed above is _____

Horizontal Lines

A **horizontal line** is written in the form $y = a$, where a represents the line's y-intercept.

The equation of the **horizontal** line graphed above is _____

****Remember, if the line intersects the x-axis, its $x = a$, if the line intersects the y-axis, it's a $y = a$.****

examples

Directions: Write the equation of the line shown on the graph.

<p>1.</p>	<p>2.</p>	<p>3.</p>
<p>4.</p>	<p>5.</p>	<p>6.</p>

Directions: Graph the line that represents the equation shown.

7. $y = -3$

8. $x = -4$

9. $y = 2.5$
